

4.5 What's New in This Edition

092625 Degederon Version 4.5

- **Housekeeping** - Corrected 3 instances of " StrengthenCourage " to "StrengthenCourage".
- **Housekeeping** - Corrected 1 instance of "stealth" to "Stealth".
- **Housekeeping** - Added missing multiplayer color markers missing from rules.
- **Housekeeping** - Revisted all tables & reformatted to display consistent font, size and spacing results.
- **Housekeeping** - Restructured History section
- Suggested by MyWy to change font size to make scripts more readable. Changed from Calibri to Consolas 11pt (**fixed-width font for the JSON code**).
- **NEW** - Appendix B – Master C# Libraries (HouseRules vs Revolutions) Downloadable spreadsheet with all C# code hyperlinks to respective owner Github pages for reference.
- **Section 10** - Ability Names List with Card Names now provides a downloadable spreadsheet.
- **Section 26** - Cool links have been updated

*** NEW ***

Projects currently underway for Dege's Demeo Setup and User's Guide

- New sections to be created for rule terms not already documented
- Coming soon – Demeo campaigns created by Dege with the assistance of AI. In the lab we currently utilize four AI engines that will be used to devise playable scenarios.
 - **Context** - Align with user goals, setting, and constraints.
 - **Relevance** - Include updated and pertinent details such as abilities, categories, compatibility.
 - **Clarity** - Ensure scenarios are concise, logical, and easy to understand.
 - **Consistency** - Maintain coherence with provided data.
 - **Variety** - Offer diverse options to cover different use cases (e.g., hero vs. enemy abilities).
 - **Feasibility** - Ensure scenarios are practical within the Demeo system's mechanics.
 - **Playability** - Ensure intuitive, fun hero abilities that integrate with *Demeo's* card system for smooth gameplay and can incorporate HouseRules and additional capabilities.
 - **Balance for Heroes** - Assign abilities to match roles, with progressive scaling and balanced enemy stats.
- Research and document the capabilities when combining abilities, behaviors, effects, piece types etc.

Dege poured extensive effort into making this guide more reliable, accessible, and inspiring. Here's a summary of the key improvements -

1. **Comprehensive Rule Audit** - Every rule in the guide has undergone a thorough review—examined, tested, and verified for functionality. These are now production-ready for integration into your JSON scripts.
2. **Enhanced Examples with Detailed Comments** - Nearly all examples have been overhauled to include line- by-line annotations, explaining the purpose and mechanics of each JSON element for easier learning and implementation.
3. **Full Testing Coverage** - Each rule has been loaded into active scripts and rigorously tested to confirm accuracy and performance.
4. **Visual Change Indicators** - Corrections to scripts—such as syntax fixes or ability name updates—are highlighted in **blue** for quick identification and reference.
5. **Revolution Rules Integration** - All Revolution Rules are now included, backed by over 40 hours

of dedicated testing conducted in the final week before release.

6. **AI-Powered Validation** - Four advanced AI engines were employed to cross-verify the accuracy, playability, and balance of rewritten rules, ensuring a high standard of quality.
7. **Expanded Section 10 – Abilities** - This section now features dual lookup lists—one sorted by ability name and another by card name—for faster navigation and reference.
8. **Deep Dive in Section 15 – Cards** - We've loaded and evaluated every conceivable card, assessing its functionality, visual rendering (e.g., "paints" correctly), aesthetics, potential issues (broken or suboptimal), and overall viability. Discover hidden gems or troubleshoot edge cases you might not have encountered before.
9. **Updated Color Icons** - Two new color icons have been incorporated and applied across relevant rules, optimizing for skirmish and multiplayer scenarios.

New Resources and Tools

To support your modding journey, we're excited to introduce these fresh assets -

- **YouTube Channel** - Dive into video tutorials and walkthroughs at [Dege's Demo Group](#).
- **Ability Converter "How To" Video** - A step-by-step guide to using the tool is now live on YouTube—perfect for transitioning your JSON abilities to the latest naming conventions.
- **Ability Converter Program** - Download the latest version from [Dege's GitHub repository](#). It includes a detailed walkthrough for validating and converting your abilities effortlessly.

Happy Modding! *Dege*
